Overview

The purpose of Order Delete module is to delete order from admin panel. This module is supported with multi-website and can be managed from admin section by admin users.

Business Value

The main usage of this extension is to allow admin to delete orders.

Features List

- The admin can enable/disable module from admin panel.
- Admin can delete order from order page
- Delete button will delete order, invoice, shipment and credit memo linked with current order
- If admin want to delete multiple order using the select then also can it.
- This will help to delete those orders that were created for testing purpose.

How Does The Extension Work?

Admin user can enable order delete module to delete those orders which are created for testing purpose and need to eliminate those unwanted orders from order page . Store owner can delete unwanted orders, just click on delete button located on the top of the order detail page.

Benefits

Store owner can able to delete those order that were created for testing purpose and now want to eliminate those unwanted orders. Unfortunately, default Magento doesn't support any functionalities to remove those orders from the backend. Order Delete extension is developed to help store admins simplify this task.
